

EARTHWORM CASTINGS

Organic Soil Builder

4
LBS

GUARANTEED ANALYSIS

Total Nitrogen (N)	0.80%
Available Phosphate (P205)	0.60%
Soluble Potash (K20)	0.60%

Mother Nature in its purest form. This long lasting organic soil builder provides remarkable benefits Vigorous Plant Growth, Fibrous Root System and improved Aeration of Soil.

Worm castings are thousands of durable cylindrically shaped pellets that resist packing and keep soil loose. This allows oxygen to permeate and remain in the root zone where it is vitally needed.

Directions

USE DIRECTLY FROM THE BAG ON INDOOR OR OUTDOOR PLANTS.

Vegetables & Annual Flowers: Line bottom and sides of plant holes and seed furrows with 1" – 2" of earthworm castings. Set seeds or plants in place and cover with soil. Side dress during growing season at a rate of ½ cup per plant or 1 cup per linear foot of row once every 2 months.

Perennials: Work ½ cup into soil above their root zone taking care not to damage shallow roots. Apply in Spring, Early Summer and Early Fall.

Casting Tea: Soak 1 part castings in 3 parts water for 12-24 hours. Stir well and water as usual. Casting tea is excellent for fruiting, flowering or difficult to access potted plants.

Lawns New: Apply 10lbs per 100 sq. ft. Work lightly into topsoil. Mix in grass seed and water well.

Lawns Established: Distribute as top dress 10lbs. per 100 sq. ft.

Potted Plants & Seeds/Seed Flats New: Potting Mix – Use 1 part earthworm castings to 3 parts soil. (1/4 ratio).

Potted Plants, Window Boxes or Hanging Baskets Established: Add 1" – 2" of earthworm castings to top of soil. Mix in taking care not to damage shallow roots – water – repeat every 2-3 months.

Roses, Trees, Shrubs and Berries New or Freshly Transported: 1 part earthworm castings to 3 parts soil. Surround newly dug hole with mixture. Spread roots over a mound of the mix and cover.

Roses Established: Mix 4 cups of earthworm castings into soil 2" – 3" below the surface for each plant.
